Index

Volume 32 Nos 1–10
January/February–December 1990

SUBJECT INDEX

Adding graphics and animation to Estelle 149
algebraic specifications 686
algorithm 423
Analysing CASE system characteristics: evaluative framework 415
analyst/designer workbench 46
Architectural considerations for providing statistical analysis of distributed data 459
Are software cost-estimation models accurate? 187
artificial intelligence 266, 653
attribute grammars 347
Attribute-grammar interpreter for inexact reasoning 347
automated testing 26
Automatic software test generation 337
automatic test generation 337

Back-to-back testing 34
back-to-back testing 34, 677
Berlin 330
Beyond relational databases 258

BOOKS AND PUBLICATIONS
Almasi, G S and Gottlieb, A Highly parallel computing 383
Anderson, D Artificial intelligence and intelligent systems: the implications 229
Babb II, R G (ed) Programming parallel processors 638
Budgen, D Software development with Modula-2 511
Christian, K The Unix operating system 229
Connel, J L and Shafer, L B Structured rapid prototyping — an evolutionary approach to software development 318
Daniels, B K (ed) Achieving safety and reliability with computer systems 444
Doukidis, G I, Shah, V P and Angelides, M C LISP: from foundations to applications 166
Doukidis, G I and Whitley, E A Developing expert systems 319
Farreny, H AI and expertise: heuristic search, inference engines, automatic proving 638
Field, A J and Harrison, P G Functional programming 166
Gehani, N and McGettrick, A D (eds) Concurrent programming 164
Heap, G Evaluating software tools for systems analysis and design 165
Helander, M (ed) Handbook of human-computer interaction 167
Kerridge, J Developments using Occam 446
Khakhar, D and Iversen, V B (eds) Information network and data communication, II 230
Kitchenham, B A and Littlewood, B (eds) Measurement for software control and assurance 444
Laver, M Information technology: agent of change 447
Leigh, A W Real-time software for small systems 318
Leithauser, D Exploring natural language processing: writing Basic programs that understand English 319
Lins, C The Modula–2 software component library 231
Longworth, G, Nicholls, D and Abbott, J SSADM developer's handbook 164
Lorin, H Aspects of distributed computer systems 165
Maddix, F and Morgan, G Systems software: an introduction to language processors and operating systems 231
Morik, K (ed) Knowledge representation and organization in machine learning 510
Narayanan, A On being a machine, volume 1: formal aspects of artificial intelligence 446
Perrott, R H Parallel programming 445
Pilavakis, A J Unix workshop 510
Ravden, S and Johnson, G Evaluating usability of human-computer interfaces: a practical method 509
Sebesta, R W Concepts of programming languages 230
Sessions, R Reusable data structures for C 509
Sincovec, F and Wiener, R S Modula–2 software components 383
Yourdon, E Modern structured analysis 639

buddy systems 432

CASE 46, 237, 415
case study 207, 253, 370, 491
Case study of risk management, incremental development, and evolutionary prototyping 207
CASE tools 357
CMEA 330
complexity metrics 106
computer graphics 199
computer-aided design 199
computer-aided software engineering 415
concurrent programming 497
concurrent systems 133
configuration management 400
conformance testing 613
Considering quality in the management of software-based development projects 18
consistency checks 46
Correctness verification: alternative to structural software testing 54
cost estimation 187, 643
cost-estimation models 187, 643
cost factors 65
Current ideas in knowledge-base management systems 266

data communication 330
data entry 470
data modelling 258
data processing 470
database design 357
database management systems 290, 459
databases 215, 258, 266, 274, 290, 330, 459, 579
dataflow 99
dataflow diagrams 46, 589
datastructure metrics 79
deadlock 133
decision support system 491
design description language 79
design metrics 79, 304, 311
Design metrics and aids to their automatic collection 79
Design metrics in practice 304
development methodology 207
development productivity 370
direct manipulation 665
distributed database management systems 459
distributed systems 613
distributed systems 686
dynamic metrics 71
dynamic storage allocation 432

Early life-cycle metrics and software quality models 311
Economics of reuse: issues and alternatives 643
Elastic memory: evaluation of buddy systems interface 432
Emacs 625
Enhancing software maintenance through explicit system representation 176
environments 191
Estelle 149
estimation techniques 88
evaluation 625
Evolution towards specifications environment: experiences with syntax editors 191
evolutionary prototyping 207, 237
executable specifications 589, 598
Experimental rapid prototype of undo
